PROJECT: **CARO**

Computer Science 2 Project	**Team Members:**	Chavero, Zach Adriell T.
Group Progress Report		Salorio, Lilianne Mhiles
4th Quarter		
Weeks 5-6 (Mar 30 to Mar 31)		

GOAL State your goal for the Week	**DATA COLLECTED** State/list the data collected relevant to your project	**PROGRESS** State the progress you have made so far by the end of the week
		Finished the edit task element and polished the task list (from week 4)
Make the HTML for the Schedule LIst function	https://getbootstrap.com/docs/4.1/getting-started/introduction/	
Formatting	(The link above is our basis for the rest of the goals below!)	finished formatting the task and schedule!
Format Task List..!		Format Schedule List		
Sketch the final overall visual of the program..!		We were struggling with the default color palette.. but finally decided on a format!

STRENGTHS

We currently have a lot of options for formatting and for the overall aesthetic of the program. As we're done with the hard parts (setting up the basic structure of the HTMLs..), we're left with just polishing!

AREAS FOR DEVELOPMENT

To be completely honest, although we've accomplished our goals for the week, we're still debating amongst ourselves on what the final formatting should look like. Also we really need to work on our color schemes because they look very depressing.. which is bad for our program, because it's supposed to be somewhat motivational.. Aside from that, we also have to work on transitions like fade-ins and outs.

STRATEGY FOR SUCCESS

Our strategy for this week is to consume as much tutorials as possible on formatting and take inspiration from other good websites/programs (Such as existing social media platforms.).. We are currently going back and forth on design and that's part of the strategy- communicating on what's best for the program.
