		this is the contrast theme!! ^^^^

STRENGTHS

Our project is about 90 % complete, the remaining 10% being only about aesthetics and user preferences. Our strength for this week is the smooth sailing progress, since we're left to focus on visuals, which is the easier part of the program.. haha.. Also we found a very good website for helping us with color palettes!

AREAS FOR DEVELOPMENT

Some themes are a bit hard to look at in terms of color harmony. The default theme isn't much of a problem, but deciding how we should format the rest of the palette is a little inconvenience. It doesn't affect the program that much though, since it's only a visual addition.

STRATEGY FOR SUCCESS

Our strategy for this week is to take as much advantage as possible from the internet! Color palette generators, tutorials on how to make a program look aesthetically pleasing, taking a look at others' work for inspiration, etc. As we're nearing the completion of our program, we're left to enjoy (?) the process of designing, worrying less about the back-end part of the program..
